4. Data Sources & Methodology

1. Executive Summary

This report presents a comprehensive SEO audit of **yt-seo-architect.vercel.app** for a **SaaS — free AI YouTube SEO tool (SoftwareApplication) with pSEO glossary** site, generated on July 31, 2026. Findings combine technical, content, schema, performance, visual, and search-readiness evidence as available.

59/100

SEO HEALTH SCORE

Critical Issues Found:

1. **Info:** ~6,400 of 8,328 /glossary/*-vs-* URLs return HTTP 500 (server bug), all listed in sitemap — sitemap is ~96% broken URLs
2. **Info:** Blog JSON-LD unparseable on most new posts (unescaped HTML in JSON strings)
3. **Info:** 14 bulk-AI blog posts (7/27-7/30) contain fabricated 'research' claims; missing from sitemap
4. **Info:** /pricing serves the dashboard app shell (noindex) — navigational intent mismatch
5. **Info:** E-E-A-T vacuum: anonymous ownership, brand-only bylines, fabricated metrics, empty 'Trusted by' section, Gmail contact

Quick Wins:

1. Fix vs-page server bug or drop 8.3k vs-URLs from sitemap
2. Add llms.txt / llms-full.txt (both 404)
3. Fix Organization logo.svg 404 (all templates)
4. Reconcile sitemap: remove 5 noindex pages, add 15 blog posts + 17 tools, add lastmod
5. Fix blog JSON-LD escaping + '2026 2026' title bug + duplicate canonicals

2. Audit Categories

2.1 Technical SEO

Score: **58/100**

What Works

- Model robots.txt: 8 AI search bots allowed, GPTBot/CCBot blocked, sitemap declared
- Valid sitemap, 0 duplicates, clean 308 redirects, real 404 statuses, HSTS preload + CSP
- All page types fully server-rendered (no SPA shells for crawlers)

Findings

Glossary X-vs-Y pages mass-fail with HTTP 500 (~6,400 URLs) Critical

154/500 crawled pages 500, all /glossary/*-vs-*; body: Cannot read properties of undefined (reading 'slug'); 77% of vs-URLs broken; all in sitemap

Recommendation: Fix serverless lookup for missing term data; exclude vs-URLs from sitemap until fixed; 410 unbuildable pairs

17 homepage-linked /tools/tag-generator/{niche} URLs 404 High

Cooking, coding, gaming etc. niche pages never generated

Recommendation: Generate niche pages or 301 to /tools/tag-generator

5 noindex pages in sitemap High

/dashboard, /about, /privacy-policy, /terms-of-service, /changelog listed but serve noindex

Recommendation: Remove from sitemap or make indexable

Canonical .html round-trips High

/tools -> /tools.html -> 308; /dashboard -> /dashboard.html -> 308

Recommendation: Canonical to clean URL directly

lastmod on only 0.4% of sitemap URLs Medium

35/8,667 URLs have lastmod; glossary none

Recommendation: Add lastmod sitewide

Inconsistent security headers across routes Medium

Homepage vs /blog differ in CSP/XFO/nosniff/Referrer-Policy; HSTS max-age varies

Recommendation: Unify headers in vercel.json

/blog/_TEMPLATE live and indexable with placeholder content Medium

200, index, follow, literal [POST_TITLE]/[POST_SLUG]

Recommendation: noindex it

CSP weakened by unsafe-inline/eval; analytics script blocked Medium

Vercel Analytics (cdn.jsdelivr.net) CSP-blocked; lucide loaded from unpkg

Recommendation: Consolidate scripts, tighten CSP

Dead links: /contact.html 404, 2 stale /public/tools/*.html Low

Linked from site, return 404

Recommendation: Redirect or remove

2.2 Content Quality

Score: 45/100

What Works

- Glossary terms genuinely deep: 836-1,040 words, definition-first, 25-28 related links
- Solid older long-form blog posts; full Spanish localization (2,857 pages)

Findings

14 bulk-AI blog posts with fabricated 'research' (scaled content abuse) Critical

Invented studies ('1 billion views'), broken grammar, byline mismatch (Team vs Patrick), no sources; published 7/27-7/30

Recommendation: Pull or rewrite with real data, named author, citations; add human review gate

Fabricated performance claims as fact Critical

'30-50% CTR improvement', '10,000+ titles analyzed', empty 'Trusted by YouTube Creators'

Recommendation: Replace with honest claims or real data

Boilerplate 'How to Optimize' blocks on 2,857 glossary pages High

4-6 shared templates reused sitewide, nonsensical on some terms

Recommendation: Per-term guidance or remove

Glossary 'Related Blog Posts' link to 404/410 URLs High

e.g. /blog/youtube-algorithm-changes-2026 -> 410

Recommendation: Fix link targets or filter dead posts

Anonymous E-E-A-T High

No named founder, brand-only bylines, no legal entity, bare Gmail contact

Recommendation: Named authors, About page, legal entity, professional contact

Meta descriptions missing on tool pages; glossary metas 229-246 chars High

Templated suffix truncates in SERPs

Recommendation: Write unique ≤160-char descriptions

Blog->tool linking absent; cannibalization /blog vs /tools Medium

25+ identical slug pairs both indexable; no hub-and-spoke

Recommendation: Canonical/301 one variant; add cross-links

Glossary readability FK 14-16 for beginner audience Medium

College-level prose on beginner topics

Recommendation: Simplify; target FK ~8-10

14 posts missing from sitemap; blog index shows '0 words' **Medium**

New posts not in sitemap; index cards empty

Recommendation: Auto-regenerate sitemap on publish; fix index bug

Stale freshness signals **Medium**

Changelog stale since May; homepage 'actively maintained' claim

Recommendation: Update changelog, add updated dates

Title/meta/h1 bugs **Low**

86-96 char titles, 15x H1 on one post, 'Shorts up to 60 seconds' outdated, '0 AI Tools' stat, leftover pricing modal

Recommendation: Fix per-item

2.3 On-Page SEO

Score: **62/100**

What Works

- Titles + meta descriptions present on all crawled 200-pages; canonicals present sitewide (verified)
- Clean URL structure; single H1 on 321/325 pages

Findings

Title length: 198/500 > 60 chars, 79 > 70 chars **High**

SERP truncation on glossary (~72 chars) and blog (93 chars) templates

Recommendation: Trim templates to <= 60 chars

/tools vs /blog keyword cannibalization **High**

35/38 /tools/ sitemap URLs are article slugs duplicating /blog/

Recommendation: One canonical home per keyword

16/21 tool pages are 98-180 word shells; one renders 'undefined' **High**

Transactional pages lack content; keyword-difficulty-scorer shows literal 'undefined'

Recommendation: Real content per tool: how-to, examples, FAQ

Blog hub '0 words' on 14 newest posts; '2026 2026' titles Medium

Index bug + title duplication on indexable posts

Recommendation: Fix generation templates

Sitelinks searchbox targets login-gated /dashboard?q= Low

WebSite SearchAction ineligible

Recommendation: Point at public search or remove

2.4 Schema / Structured Data

Score: 50/100

What Works

- Homepage valid @graph: WebSite + SoftwareApplication (price 0) + Organization + FAQPage + Breadcrumb
- Glossary breadcrumbs 4-level correct; blog Article has author/dates/publisher

Findings

Blog JSON-LD unparseable (unescaped HTML) Critical

2/3 sampled posts fail json.loads; duplicated Article+FAQPage blocks

Recommendation: Fix template escaping; one block per page

Organization logo.svg 404 on all templates High

Homepage + 8,571 glossary pages reference missing logo

Recommendation: Fix asset or point at og-image.png

/blog and /tools hubs have zero schema High

No ItemList/BreadcrumbList on index pages

Recommendation: Add hub schema

SearchAction targets login-gated dashboard High

Ineligible for sitelinks searchbox

Recommendation: Remove or redirect to public search

FAQPage deprecated (July 2025) but deployed sitewide Medium

Valid markup, no rich-result benefit; still useful for AI answers

Recommendation: Keep for AI extraction; don't expect SERP features

Glossary uses Article instead of DefinedTerm Medium

8,571-page opportunity

Recommendation: Switch to DefinedTerm

Minor: '75+ terms' hub copy, trailing-slash mismatches, duplicate canonicals, SpeakableSpecification inert Low

Consistency issues

Recommendation: Clean up

2.5 Performance (CWV)

Score: 70/100

What Works

- Fully server-rendered HTML, Vercel edge + br compression + cache HITs
- Preconnect to Google origins; HSTS preload; near-zero images

Findings

Lab/field CWV data unavailable this run Info

PSI API daily quota exhausted; Unlighthouse timed out on WSL. Score is an architecture-based estimate.

Recommendation: Connect GSC CrUX; run Lighthouse on non-WSL machine

Third-party render dependencies (lucide via unpkg) Medium

3 JS + 5 CSS on homepage; unpkg has no SLO

Recommendation: Bundle or inline icons

CSP blocks Vercel Analytics Medium

cdn.jsdelivr.net blocked; analytics dead

Recommendation: Align CSP allowlist with real scripts

picsum.photos blog hero hotlink Low

Random-image CDN, uncacheable

Recommendation: Self-host WebP heroes

2.6 AI Search Readiness

Score: 72/100

What Works

- Model AI-crawler policy (8 AI bots allowed, 2 training bots blocked)
- Every page type fully server-rendered for AI crawlers; definition-first glossary highly quotable

Findings

llms.txt / llms-full.txt both 404 High

Biggest missing GEO asset for a tool site

Recommendation: Add llms.txt + llms-full.txt

TL;DR blocks contain keyword-stuffed artifacts Medium

AI will quote verbatim; claims lack citations

Recommendation: Clean templates; add sources

Dashboard CSS force-unlock of premium UI Medium

'Free & Unlimited Overhaul' stylesheet overrides .premium-locked; contradicts '100% Free' claim

Recommendation: Remove or align product claims

Casing, security.txt, Gmail in Organization schema **Low**

Youtube vs YouTube; no security.txt; personal Gmail as org contact

Recommendation: Polish

2.7 Images

Score: 80/100

What Works

- Near-zero image footprint on critical templates; no missing alt; width/height on blog heroes

Findings

Blog heroes hotlink picsum.photos (random placeholder CDN) **Medium**

Unstable, off-brand, third-party dependency

Recommendation: Self-host branded 1200x630 WebP images

No og:image on non-blog templates; logo.svg 404 **Low**

Social/AI previews missing

Recommendation: Sitewide branded og-image

3. Action Plan

Phase 1: Critical Fixes Week 1

- Fix or remove 8,328 vs-URLs (6,400 broken -> 500)
- Fix blog JSON-LD escaping
- Reconcile sitemap (remove 5 noindex, add 15 posts + 17 tools, lastmod)
- Fix 17 homepage 404 niche links
- Fix logo.svg 404
- Pull/rewrite 14 bulk-AI posts
- Add llms.txt + llms-full.txt

Phase 2: High-Impact Improvements Weeks 2-3

- Resolve /blog vs /tools cannibalization (25+ pairs)
- Build real indexable /pricing page
- E-E-A-T pass (founder, bylines, entity, citations)
- On-page: titles <=60, 2026-2026, metas, H1
- Header/redirect hygiene + noindex _TEMPLATE
- Hub schema + DefinedTerm glossary

Phase 3: Content & Authority Month 2

- Depth for 16 thin tool pages
- Glossary boilerplate + dead links + readability
- Topic gaps: monetization, community, Shorts split
- Perf: bundle lucide, kill picsum, fix analytics
- AI-search polish: TL;DR cleanup, security.txt
- Backlink program (domain absent from Common Crawl)

Phase 4: Monitoring & Iteration Ongoing

- Connect GSC/GA4/CrUX + Indexing API
- Publishing guardrails: fact-check gate, sitemap auto-gen, broken-link CI
- Drift baseline + re-audit in 60 days

Data Sources & Methodology

Source	Description	Update Frequency
PageSpeed Insights API	Lighthouse lab audit (mobile emulation, Moto G Power, slow 4G)	Real-time
Chrome UX Report (CrUX)	28-day rolling field data from real Chrome users	Daily ~04:00 UTC
CrUX History API	25-week p75 trend data per metric	Weekly
Google Search Console	Search Analytics (clicks, impressions, CTR, position)	2-3 day lag
URL Inspection API	Per-URL index status, coverage state, crawl info	Real-time (2,000/day)

Report generated by Claude SEO — Google SEO Intelligence Skill — July 31, 2026
Methodology based on Google Web Vitals thresholds, Search Console documentation, and Lighthouse scoring algorithms.
